

# Bona Soap

## Technical data sheet

Bona Soap is a slightly alkaline cleaner specifically developed for wooden floors treated with Bona oils. It includes additives designed to nourish the surface and replace the material removed during the cleaning process.

- Specifically designed for oiled wooden floors
- Suitable for both homes and commercial buildings
- Restores some grease to the surface
- Easy to use

### Technical data

pH-value:	9-10 when diluted with water
Density:	1.1 kg/dm <sup>3</sup>
Dilution:	0.2 litre / 10 litres of water
Safety:	Unclassified
Flash point:	Non-flammable
Shelf life:	At least 5 years, from the date of production, in unopened original container
Storage:	Store frost-free
Pack size:	2 x 5 litres (54 boxes per pallet) 4 x 1 litre (120 boxes per pallet)

### Preparations

Remove loose dust/grit etc using a vacuum cleaner, scissor mop or other dry cleaning method. Shake the container well and dissolve 0.2 litre Bona Oil Cleaner in 10 litres of water.

### Application

Clean along the grain using a well wrung-out cloth, mop or similar. For very dirty floors the use of a buffing machine with a green pad is recommended.

n.b. It is important that the amount of water used to clean the floor is kept to a minimum. If a glossier surface is required, the floor can be dry buffed. The best results are obtained using a buffing machine (300 revs/minute) and a red or white pad.
